

The Lace Mill in 1956.

Some of the machinery in the mill was dismantled previous to the closing. Stan Edwards, E. Gregory, and A. LeBranch are removing a Perkins Roll for packing and shipping. The weight of the roll was 4,400 pounds. The date of this picture is April 22, 1950. Much of the machinery was shipped to plants in the south.

Here weaving machine number 27 is dismantled for scrap.
