

The Great South Bay could get rough in stormy weather. This picture was taken from Mickey Felice's backyard, looking west towards the Sandspit.

It did not have to be a hurricane to flood the shoreline. A heavy storm with gale force winds, combined with a high tide, caused this flooding of Smith Street in November, 1953.

Another picture of Smith Street under water in December 1962 after a storm. Improvements have been made in the past years to prevent this kind of a problem.

The intersection of North Ocean Avenue and Oak Street always had been prone to flooding caused by heavy rainstorms. Many improvements have been made, including the installation of large pump systems to minimize this problem.
